1. Scope of Application

Sidra Capital (“the Company”) is a Saudi closed joint stock company registered in Jeddah, Kingdom of Saudi Arabia under Commercial Registration No. 4030187025 on February 25, 2009, corresponding to 30/2/1430H. The Company commenced its operation as per the resolution of Ministry for Commerce and Industry, dated January 24, 2009, corresponding to 27/1/1430H.

The Pillar III disclosures contained herein relate to the audited financials of Sidra Capital for the period ended December 31, 2014. These are compiled in accordance with CMA’s minimum requirements for the annual market disclosure of information as referred to by the Part 7 “Pillar III – Disclosure and Reporting” of the Prudential Rules. These rules include guidelines for the annual market disclosure of the Company’s capital and risk management information required to be published on Sidra website.

Sidra is not part of a financial group, does not have any subsidiaries and therefore has no current or foreseen material or legal impediments for transfer of capital. Sidra’s organisation structure is provided in Appendix 1.

This Pillar III Disclosure has been approved by the Board of Directors of Sidra Capital before its publication. The information presented in this Pillar 3 Report is not required to be, and has not been, subject to external audit.

1.1 Company Background

The Company’s principal activities include dealing in securities as principal and agent, management, custody, arranging and rendering financial advisory.

Sidra operates as a Shari’ah compliant non-bank financial institution (“NBF1”) and aims to be a leading financial advisory and services NBF1 that undertakes. The activities of the Company licensed by the Capital Market Authorities are as follows:

	Licensed Activities							
	Dealing			Managing		Arranging	Advising	Custody
	Principal	Agent	Underwriting	Investment Funds	Client Portfolio Mgt.			
Sidra Capital	✓	✗	✓	✓	✓	✓	✓	✓

The focus is on Corporate Finance & Advisory (Debt Advisory, Private Placements and Financial Advisory) and Asset Management (alternative investment universe, such as real-estate and structured commodity trade).

Corporate Finance and Advisory (CFA)

This department is engaged in the following services:

1. Mergers and Acquisition.
2. Fund Raising (debt and equity).
3. Private Placement.
4. Financial Restructuring.
5. Business Development Advisory Services.

Asset Management Business

The main objective of the department is to be amongst the leading asset managers in Saudi Arabia. The focus will continue to be on alternative investments similar to the current products that we have in this area and which are income generating UK real estate fund and structured trade fund.

2. Capital Structure

The Company's objectives when managing capital are to comply with the capital requirements set by the Capital Market Authority (CMA) to safeguard the Company's ability to continue as a going concern and to maintain a strong capital base.

Restrictions on Capital

- The shareholders are not permitted to sell their shares, increase or reduce ordinary share capital or issue rights without the authorisation of the CMA.
- Statutory Reserve - In accordance with Regulations for Companies in Saudi Arabia, and after recovering the accumulated losses, the Company will establish a statutory reserve by the appropriation of 10% of net income until the reserve equals 50% of the share capital. This reserve is not available for dividend distribution.
- During the year ended December 31, 2013, new Prudential Rules (the "rules") were introduced by the CMA pursuant to its Resolution Number 1-40-2012 dated 17/2/1434H corresponding to 30/12/2012G. The rules state that an authorised person shall continually possess a capital base which corresponds to not less than the total of the capital requirements as prescribed under Part 3 of Prudential Rules.

2.1 Quantitative Disclosure

2.1.1 Tier 1 Capital

Tier-1 capital of the Company consists of paid-up capital, reserves (other than revaluation reserves) and audited retained earnings and has deductions in the form of dividend expense from retained earnings & negative equity items. The Company's biggest strength in terms of capital is that all of the capital is in the form of Tier I capital. The Company has a comfortable cushion for capital shocks.

2.1.2 Tier 2 Capital

Tier 2 capital consists of subordinated loans, cumulative preference shares, revaluation reserves and other eligible capital items in accordance with Prudential Regulations. The Company does not have any Tier 2 capital.

2.1.3 Total Capital

The total eligible capital (Tiers 1 and 2) calculated in accordance with CMA guidelines as of December 31, 2014 is as follows:

	SAR 000	
Capital Base	31 Dec 2014	31 Dec 2013
Tier-1 capital		
Paid-up capital	90,000	90,000
Audited retained earnings	-14,869	-20,730
Share premium		
Reserves (other than revaluation reserves)		
Tier-1 capital contribution		
Deductions from Tier-1 capital		
Total Tier-1 capital	75,131	69,270

	SAR 000	
Capital Base	31 Dec 2014	31 Dec 2013
Tier-2 capital		
Subordinated loans	-	-
Cumulative preference shares	-	-
Revaluation reserves	-	-
Other deductions from Tier-2 (-)	-	-
Deduction to meet Tier-2 capital limit (-)	-	-
Total Tier-2 capital	-	-
TOTAL CAPITAL BASE	75,131	69,270

3. Capital Adequacy

The purpose of risk management is to identify and quantify risks faced by the Company, mitigate and manage such risks within the context of the Company's overall risk appetite. The Company is engaged exclusively in financial advisory and asset management services and does not undertake leverage on its balance sheet. As such and following the capital increase in 2010, Sidra has consistently maintained an amount of capital that is in excess of the minimum regulatory capital needed by the Authority.

Risk is part of the business and the Company needs to effectively identify, monitor and manage each of the risks that are likely to emerge during the operations. Going forward, the Board of Directors will need to review the material risks and considers the results of the work of the management in mitigating those risks.

The capital adequacy calculation has been calculated as at 31st December 2014 which correspond to the end of the annual reporting period for the Company and are based on the audited financial statements.

Sidra's capital requirement is calculated based on CMA Prudential Rules. Sidra's minimum capital requirement is SAR 55.274 million as of December 31, 2014. Details are provided in Appendix 2.

3.1 Capital Adequacy Assessment and Pillar II - ICAAP

The Internal Capital Adequacy Assessment Process (ICAAP) is introduced under Pillar II of the Prudential Rules, which is contained in Part 6 (Article 66) and Annex 9 of the Prudential Rules approved by the Capital Market Authority (CMA or Authority) and to be implemented by all Authorised Persons (APs).

The Company is well capitalized and will be able to allocate capital for both Pillar 1 and Pillar 2 risks.

3.2 Capital Planning

Capital Planning is crucial for the survival and leads management to strategic decisions. The Company's capital planning process needs to incorporate rigorous, forward looking stress testing to indicate how much capital might be needed to absorb losses if large shocks occur. Effective capital planning process requires the Company to assess risk exposures and consider the potential impact on earnings and capital.

Capital Planning is done based on present level of business and projected business for the future. The Company projects its capital requirements on annual basis and also for the next three years.

The Company has a general contingency plan for dealing with divergences and unexpected events. The Company has a single major shareholder that can provide for additional capital in the event of major events. The Company can also swiftly modify its business plans to focus on advisory services that require little or no capital.

The Company defines overall risk appetite relating to capital adequacy. As part of this, Early Warning Indicator (EWI) levels are established to enable the Company to take adequate measures on a timely basis. Action plan for capital management are triggered as part of ICAAP process on breach of EWI established for capital. The risk appetite and capital ratio EWI triggers are defined in the ICAAP policy. In case the capital ratios are projected to fall below regulatory and acceptable levels, the Company takes actions to either reduce exposures or enhance capital or do both of these.

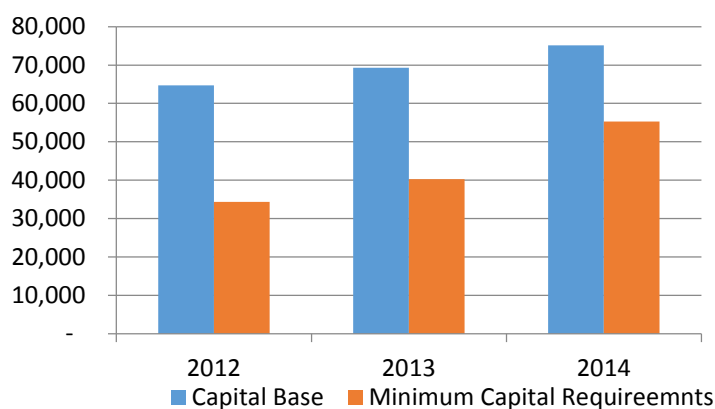

3.3 Stress Testing

The Company has defined a formal approach to stress testing and Scenario Analysis that defines the framework and approach for conducting stress tests to assess the impact on earnings and capital. Stress scenarios have been designed for material risk factors.

Stress testing is used to evaluate potential vulnerability of risk management system of the Company to certain unlikely but plausible events or movements in financial variables. Stress testing can be done by using sensitivity analysis (wherein impact of change in one variable is assessed on the Company's financial position) or using scenario test (which include simultaneous moves in a number of variables based on a single event experienced in the past).

3.4 Minimum Capital Requirements

Sidra is well capitalised and capital levels are consistently higher than minimum capital requirements. The following provides the capital buffer over the past three years.

4. Risk Management

The diversified business activities require the Company to identify, measure, aggregate and manage risks effectively and to allocate capital among its businesses appropriately.

Given the size of the Company and its operations, the Company has adequate risk management framework to identify and manage major risks. The Company is in the process of defining a separate risk function and refine its key risk management policies that are currently not implemented. The Company is working towards integrating risk management into its operations and culture and plans to achieve this over the next few years.

The Company has a reasonably strong corporate governance structure as a result of which management and governance related risks are well managed. It aims to outline and make known, in the best possible way the organisation's established vision, business principles, strategies and best practices towards achieving the missions of the organisation, as a Shari'a compliant financial institution. It also takes into serious considerations the interests of various stakeholders of the organizations including the regulators, clients and business partners.

The Board of Directors is responsible for the overall governance of the Company. This includes, determining the strategy, providing direction to the Senior Management, ensuring that the control functions are robust and that they conforms to international best practices. The Company has adequate risk governance framework as part of strengthening its Corporate Governance and Risk Management structures.

An outsourced risk function provides second line of defence and outsourced internal audit function provides oversight / third line of defence over internal controls.

Risk Appetite

The Company's risk appetite is the single most influencing factor in its fundamental risk attitude. Risk appetite is defined as the amount and type of risks that the Company is willing to take within the context of its business strategy. Risk appetite is either quantitatively defined by the appropriate indicators (e.g. capital adequacy level and risk limits) or qualitatively embedded in the policies and procedures (e.g., underwriting criteria).

Within the risk appetite levels specified, specific risk limits may be fixed to monitor risks on an ongoing basis. Such risk limits shall ensure that the Company operates within its

target range and does not exceed its aggregate risk tolerance. The Company's Risk tolerance levels & risk limits are part of various policy & process documents.

Breach of Early Warning Indicator or risk appetite threshold for Capital Adequacy Ratio is escalated to the Management Committee / Board. Appropriate Board level strategic decisions on the steps required to remediate the situation are taken.

Breach of other Risk Appetite Statements are escalated to the Management Committee for remediation.

Risk Management Process

The Risk Management Committee, within Sidra Capital will ensure that risk exposures are reported in a timely manner to the Sidra Capital management and/or senior management. Sidra Capital management will perform an annual review of these issues in line with article 56/a of the CMA's Authorized Persons Regulations (APR) document.

Due Diligence Process to Mitigate Investment Risk

The Company's Investments are made after proper review and approval by the Investment Committee. As part of the review process, the Investment Committee evaluates the following risk factors before granting approval:

1. Geo-political situation in the country where investment is made.
2. Current Exposure to the type of investment, product
3. Adequacy of liquid surplus after such investment is made
4. Review of Credit Rating of the investment
5. Time horizon, maturity, lock in period and other constraints.
6. Partners involved in the transaction and their financial commitment
7. Legal and tax due-diligence

All investments are made only after proper approval by the Investment Committee.

Audit Committee (AC)

Sidra has an Audit Committee (AC) to ensure that it complies with all the policies and procedures and that the recommendations of the CMA and the external auditors are considered in full and implemented where appropriate. The Committee oversees the work and considers the reports of the Company's outsourced internal audit function, overseeing the implementation of their recommendations where appropriate, and giving due consideration to the effectiveness of internal controls and compliance checks. It also makes recommendation on the appointment of the external auditor.

Internal Audit Function

Given the size of the Company, the internal audit function is currently outsourced to a local audit firm. They undertake 2 inspections per year and all units and departments are covered under their scope of work. The report is discussed with the management and presented at the MC before being finalized and submitted to the AC for their review. The Internal Auditor is present at the AC meeting where the report is discussed.

Compliance Function

As per the CMA regulation, the compliance function is one of the critical function of any AP. At Sidra, we currently have one person who is in charge of the compliance and AML functions. Other than educating and training our staff on the latest law and rules of the CMA, the person is also in charge of all KYC for our investors. Annual audits on each department is undertaken and reported to the MC. The annual compliance and AML report is discussed and approved by the Board prior to its submission to the Authority.

4.1 General Qualitative Disclosure for Risks

4.1.1 Credit Risk

Credit risk is one of the most important risks that Sidra faces in its operations and it is the failure of one or more of its major counterparties. It could be defined as the risk of a potential loss of cash reserves due to a counterparty failure or an obligor's non-payment of an outstanding debt.

Credit risk is principally controlled by establishing and enforcing limits and by defining exposure levels to counterparties and checking the creditworthiness of counterparties that are not related parties. To mitigate this risk, Sidra has diversified its banking relationships across several local Saudi and international banks.

As at 31st Dec 2014, Sidra had cash and cash equivalents SAR 20m and these are all placed with regulated entities, while receivables and other investment amounted to SAR 50.6m. Under the standardised Pillar 1 methodology, the capital required to cover credit risk in respect of these assets is SAR 46.6m.

The Company shall measure and maintain capital for credit risk as per the methodology set by CMA under Standardized Approach. Most of the credit risk for the Company originates from the Non Trading Activities.

4.1.2 Market Risk

Market risk is the risk that the value of an investment will decrease due to movements in the market. The CMA has listed the following as key market risks: equity & fund risks, interest rate risk, commodities risk, foreign exchange risk, underwriting risk and settlement risk. After discussions with external auditor and considering that Sidra does not have a trading book, the only market risk that is applicable to the Company is Foreign Exchange risk.

Foreign exchange risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in foreign exchange rates. There are two ways where changes in foreign exchange rate could adversely impact the capital position of the Company and these are through either our investment in foreign currency products or the value of fees generated from foreign currency funds managed by Sidra declining in value as compared to our base currency of Saudi Riyals.

In respect of the Company's exposure to non-saudi Riyals denominated income and expenses, the Company tries to match payment with any income in that currency. Open positions in foreign currencies is not something that we take and action is taken to convert open currency positions into Riyals on a regular basis, thereby, keeping open positions and foreign currency exchange risk to a minimum.

As at 31st December 2014, Sidra had long positions in three foreign currencies – GBP, US and AED. Under Pillar 1, the market risk has still been calculated at 2% (for USD and AED currencies) and 14% (for GBP) of the Saudi Riyals equivalent open positions respectively, and amounts to SAR 4.2m as at 31st December 2014.

4.1.3 Operational Risk

Basel II requires financial institutions to have sufficient capital to cover Operational Risks. Operational Risk is defined as risk of loss resulting from inadequate or failed internal processes, people and systems as also the risk of loss arising from external events. More than the regulation, Basel II provides opportunity to improve internal control and risk measurement processes supplemented by supervisory review process and market discipline through Pillar II as well as Pillar III of the Accord

4.1.4 Interest Rate Risk

The exposure of the Company's financial condition to adverse movements in interest rates is referred to as Interest Rate Risk. The Company has no trading book. Since all of the

Company's sources of funds are equity and there are no interest sensitive liabilities, Interest Rate Risk on the Banking Book (IRRBB) has negligible impact on Company's capital requirement.

1.1.1. **Concentration Risk**

Credit risk concentrations may involve large exposures to groups of connected clients. These groups refer to companies which are legally or economically connected in such a way that a majority of the individual companies in the group would encounter repayment problems if a single one of them encountered financial difficulties. Credit risk concentrations can generate such large losses that the risk-bearing capacity and continued existence of the Company might be endangered.

Types of Concentration risk

Concentration risk can take many forms and can arise whenever a significant number of credits have similar risk characteristics. Large exposures and high correlation between exposures could increase the amount of losses for the Company, and can arise from the following:

- Revenues generated from a particular geographical regions/jurisdictions
- Revenues from a specific client
- Revenues from a specific product
- Revenues from a particular industry or economic sectors

Management of Concentration Risk

Concentration Risk is managed through prescription of various prudential / exposure limits.

- Large Exposures - Currently, the Company is not significantly exposed to any particular client other than related parties. In other case, Sidra has recourse to cash that the debtor has invested with Sidra and which can be netted out in the event of default by the debtor.
- Geographic Concentration - The Company is marginally exposed to geographic concentration as most of its investments are in Saudi Arabia .The Company does not actively monitor geographic concentration as the Company is aware that the geographic concentrations are a result of its business model. Further, the exposures are well diversified.
- Industry Concentration - The Company is exposed to industry/sector concentration. The Company is taking measures to control exposures to highly concentrated industry sector by prescribing risk appetite limit and also approaching the Board with an action plan reduce such exposures.

4.2 **Credit Risk Disclosure**

Credit risk consumes the largest proportion of the Company's minimum capital requirement. Within the established principles and parameters the company ensures that strict capital discipline is maintained through correct pricing and management of credit risks.

4.2.1 **Gross Credit Risk Exposures**

The gross credit exposure as presented in Appendix 3 is reflected before applying any credit risk mitigation, such as financial collaterals and guarantees. Since Sidra does not use financial collaterals and guarantees, both gross credit risk exposure and net credit risk exposure are the same.

External ratings

Sidra uses globally recognised credit ratings to determine which credit quality step an exposure corresponds to. Credit ratings of all exposures are individually determined from the above credit rating agencies and mapped to the exposures assigning a risk weight according to the Prudential Rules

As per CMA's prudential norms, an authorised person which uses credit ratings for a particular exposure category shall use these credit ratings consistently for all exposures belonging to that category.

Credit quality steps

Sidra uses CMA guidelines for assign credit quality steps for its credit exposures. The range of the quality steps is 1 to 6 and arises due to exposure to financial institutions, investment in companies and funds.

The following are the mappings between the credit rating from each credit rating agency and the credit quality steps with respect to non-trading activities. This is in compliance with the Prudential Rules issued by the CMA.

Credit quality step - Long term rating	S&P	Fitch	Moody's	Capital Intelligence
1	AAA TO AA-	AAA TO AA-	Aaa TO Aa3	AAA
2	A+ TO A-	A+ TO A-	A1 TO A3	AA TO A
3	BBB+ TO BBB-	BBB+ TO BBB-	Baa1 TO Baa3	BBB
4	BB+ TO BB-	BB+ TO BB-	Ba1 TO Ba3	BB
5	B+ TO B-	B+ TO B-	B1 TO B3	B
6	CCC+ and below	CCC+ and below	Caa1 and below	C and below
Unrated	Unrated	Unrated	Unrated	Unrated

Credit quality step - Short term rating	S & P	Fitch	Moody's	Capital Intelligence
1	A-1+, A-1	F1+, F1	P-1	A1
2	A-2	F2	P-2	A2
3	A-3	F3	P-3	A3
4	Below A-3	Below F3	Not Prime	Below A3
Unrated	Unrated	Unrated	Unrated	Unrated

Credit Risk Exposures by Credit Quality

The credit risk exposure by long term and short term ratings is given as Appendix 4 and follows Annex 11 and 12 of the Prudential rules to determine the credit quality.

Residual Contractual maturity

The residual contractual maturity of Sidra's credit risk exposures is given in the Appendix 5.

Impairment, past due and provisions

An exposure is identified and recognized as impaired when it is not probable or no reasonable assurance exists that the Company will be able to collect all amounts due according to the contractual terms. The exposure can be a receivable from the customers or employees of the Company or an investment made by the Company.

Past due claims are exposures where repayments of principal and /or profit charges have

not been made as of the due date. The Company's policy defines the approach to be used when determining provisions. Certain factors are taken into consideration prior to deciding on the level of provision.

The Company has no past due or impaired exposures as of 31 December 2014.

Geographic Distribution of Credit Risk Exposures

Credit Risk Exposures of the Company are geographically concentrated in Saudi Arabia. The following table provides geographic distribution of credit risk exposures by major exposure type.

Exposure Class	Total	Saudi Arabia	GCC (Except Saudi Arabia)	Europe	Rest of the World
<i>Credit Risk</i>					
<i>On-balance Sheet Exposures</i>	-				
Governments and Central Banks	-				
Authorised Persons and Banks	19,986	9,933		10,053	
Corporates	33,845	9,226	464	23,487	668
Retail	339	339			
Investments	21,627	5,125		15,250	1,252
Securitisation	-				
Margin Financing	-				
Other Assets	2,795	2,795			
Total On-Balance sheet Exposures	78,592	27,418	464	48,790	1,920
<i>Off-balance Sheet Exposures</i>	-				
OTC/Credit Derivatives	-				
Repurchase agreements	-				
Securities borrowing/lending	-				
Commitments	623	623			
Other off-balance sheet exposures	-				
Total Off-Balance sheet Exposures	623	623	-		-
Total On and Off-Balance sheet Exposures	79,215	28,041	464	48,790	1,920

4.3 Credit Risk Mitigation Exposure

Sidra does not deal in lending activities and as such has no eligible or non-eligible financial collaterals user for credit risk mitigation purposes. Accordingly, credit risk mitigation exposures are Nil.

Appendix 5 provides details for gross and net credit risk exposure as there are no risk mitigation exposures.

4.4 Counterparty Credit Risk (CCR) and Off-Balance Sheet Disclosure

Counterparty risk derives from the exposure to a single party in a financial transaction or business transaction. It is the risk in a transaction that may occur if the counterparty is unable to perform in accordance with the agreements executed with Sidra Capital.

Sidra does not deal with transactions in OTC derivatives, repos and reverse repos and securities borrowing/ lending. Sidra does not have any outstanding guarantees as of 31 December 2014.

Mitigating Counterparty Risk

- Sidra Capital sets criteria for appropriate due diligent analysis including processes for measuring and managing counterparty risk
- Sidra Capital sets criteria for selecting and maintaining relationships with counterparties.
- Sidra Capital sets controls that limit the exposure of capital to single counterparties expressed as a percent of the Sidra Capital's capital base (if applicable)
- Sidra Capital conducts periodic reporting and monitoring of counterparty exposures to the Investment Committee (if applicable).
- Sidra Capital takes actions to mitigate Sidra Capital's exposure in the event the financial condition of a counterparty deteriorates and doubts arise about its ability to perform in accordance with the agreements and contracts Sidra Capital has executed.

4.5 Market Risk Disclosure

4.5.1 Market risk Capital - Qualitative Disclosure

Market risk is the risk of losses in on-and off-balance sheet trading book positions arising from movements in market rates or prices such as profits rates, foreign exchange rates, equity prices, credit spreads and/or commodity prices resulting in a loss to earnings and capital.

4.5.2 Market risk Capital - Quantitative Disclosure

(Amounts in SAR 000)

<u>Market Risk</u>	Capital Required 31 Dec 2014	Capital Required 31 Dec 2013
Interest rate risks		
Equity price risks		
Risks related to investment funds		
Securitisation/re-securitisation positions		
Excess exposure risks		
Settlement risks and counterparty risks		
Foreign exchange rate risks	4,232	2,795
Commodities risks.		
Total Market Risk Capital	4,232	2,795

4.6 Operational Risk Disclosure

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events

Basel II requires financial institutions to have sufficient capital to cover Operational Risks. Operational Risk is defined as risk of loss resulting from inadequate or failed internal processes, people and systems as also the risk of loss arising from external events. More than the regulation, Basel II provides opportunity to improve internal control and risk measurement processes supplemented by supervisory review process and market discipline through Pillar II as well as Pillar III of the Accord

4.6.1 Operational risk Capital - Qualitative Disclosure

Risks in this category are broad in nature and inherent in most businesses and processes and cover the following:

- **Fraud or the risk of loss from financial crime.**
Sidra aims to minimise the opportunity for fraud and financial crime through segregation of duties and due process. In addition, the Company has outsourced its AML and terrorism financing courses to staff to Thomson Reuters.
- **Outsourcing risk**
This is the risk of loss or reputational damage as a result of service failure on the part of an outsourced service provider. Sidra does outsource certain fund administration services to reputable service providers operating in well regulated offshore centres. The Company undertakes a rigorous selection process of service providers and has an ongoing due diligence process.
- **Employee retention.**
Sidra recognizes that due to its small size there is an operational dependency on key individuals and the loss of a member could have a material adverse impact on revenues. The Company has implemented a competitive remuneration package for staff.
- **Legal action**
The risk of liability related to litigation from clients, staff or third parties is covered under legal action. This risk is mitigated by compliance with existing legislation, which is reinforced by internal policies and monitoring checks. Sidra has also both Professional Indemnity and Directors and Officers Liability insurance arrangements in place.
- **Business continuity and disaster recovery**
Physical disasters affecting Sidra's premises and continued operations could come in many different forms – fire, flood, failure of IT systems, hacking, etc. Each of these different threats presents a risk to the Company. However, the impact of these different threats materialising will have many common implications which are detailed in the Disaster Recovery and Business Continuity Plans of the Company.

4.6.2 Operational risk Capital - Quantitative Disclosure

Under Pillar 1 and using the Basic Indicator Approach, the capital needed to cover operational risks is the higher of 15% of the last 3 year gross operating income or 25% of last year's operating expenditure. For Sidra, the capital needed is based on 25% of the last year expenditure and amounts to SAR 4.4m.

Approach	Year	Gross Income	Average Gross Income	Risk Capital Charge (%)	Capital Required
Basic Indicator Approach	2011	19,047	17,603	15%	2,640
	2012	11,210			
	2013	22,552			
Approach	Year	Expenses	Risk capital Charge (%)		Capital Required
Expenditure Based Approach	2014	17,533	25%		4,383
Minimum Operational Risk Capital - December 2014					4,383
Minimum Operational Risk Capital - December 2013					4,388

4.7 Liquidity Risk Disclosure

Liquidity Risk is the 'potential for loss' to Sidra arising from either its inability to meet its obligations or to fund assets as they fall due without incurring unacceptable cost or losses.

Liquidity Risks can be classified as-

- Funding liquidity risks: Need to replace net outflows.
- Time risk: Need to compensate for non-receipt of expected inflows,
- Call risk: Due to crystallization of contingent liabilities.

Liquidity Risk is best understood as Funding Liquidity Risk - the risk that the Company will not be able to efficiently meet both expected and unexpected current and future cash flow needs without affecting either daily operations or its financial condition. This is the risk that Sidra does not have the available resources to meet its payment obligations as they fall due or can only secure such resources at excessive cost.

4.7.1 Risk Assessment Methodology

The Company identifies the liquidity risk on an on-going basis. To mitigate these risk Sidra's liquidity management guidelines requires that the Company maintain enough cash to pay all projected operating costs for a period of 12 months.

4.7.2 Risk Measurement Methodology (Quantitative / Qualitative)

In order to ensure adequate liquidity availability and healthy funding profile, the Company uses various metrics and internal controls. The liquidity risk measurement approach is qualitative and Early Warning Indicators (EWI) based.

4.7.3 Liquidity Early Warning Indicators (EWI)

Early warning indicators help in identifying the emergence of increased risk or vulnerabilities in the Company's liquidity risk position or potential funding needs

The EWIs measure the Liquidity Risk position of the Company from various perspectives, including the following:

1. Adequacy of Funding Buffer
2. Unutilized Banking Limits
3. Adherence to Regulatory Limits
4. Repeated incidents of breach of internal limits

Risk Mitigation

Liquidity risk is mitigated by the fact that Sidra has no debt, maintains cash levels in excess of regulatory capital requirements and its main cost items are discretionary compensation which is linked to profitability. It also include the risks that investments in illiquid instruments cannot be exited in an efficient manner in the event of a downturn.

To mitigate these risk Sidra's liquidity management guidelines requires that the Company maintain enough cash to pay all projected operating costs for a period of 12 months. In respect of investing in long term projects, Sidra only invests in its own products. All investment are managed through the Investment Committee and regular reporting on performance and risks are made by the respective Head of Departments on the use of the Company's capital.

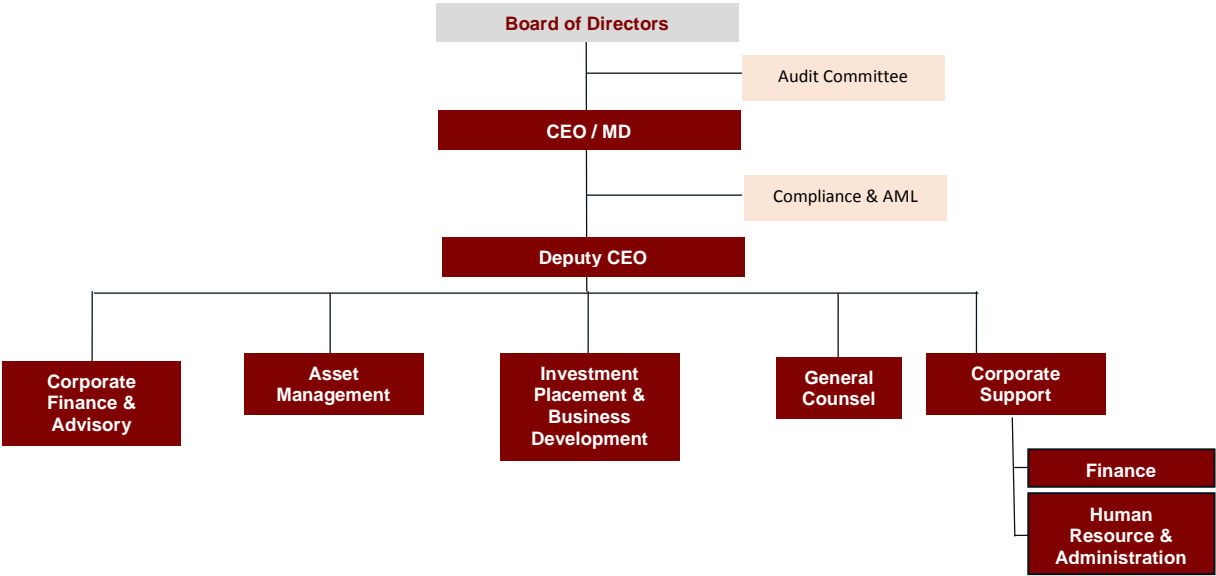

4.7.4 Contingency Plan

The Company has a general contingency plan for dealing with divergences and unexpected events. The Company has a single major shareholder that can provide for additional capital in the event of major events. The Company can also swiftly modify its business plans to focus on advisory services that require little or no capital.

Contingency Buffer

The Company proposes to maintain a contingency buffer needs equivalent to 12 months of working capital needs.
